***DETAILED ACTION***

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9 and 32-44, drawn to an apparatus and its method for controlling a reverse data rate of packet data in a mobile terminal of a mobile communication system, classified in class 370, subclass 328 or 455/67.13 (for noise detection).
  - II. Claims 10-31, drawn to an apparatus and its method in an alternative embodiment for determining reverse activity bits of a mobile terminal in a base station, classified in class 370, subclass 333 or 455/226.1 (measuring or testing of receiver for noise detection and its status).
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I describes an apparatus and its method for controlling a reverse data rate of packet data in a mobile terminal of a mobile communication system. The subcombination has separate utility such as an apparatus and its method in an alternative embodiment for determining reverse activity bits of a mobile terminal in a base station (specifications, page 7).

Art Unit: 2618

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Affirmation of this election must be made by applicant in replying to this Office action.
